# **Dissociative Experiences Scale II**

Instructions: This questionnaire asks about experiences that you may have in your daily life. We are interested in how often you have these experiences. It is important, however, that your answers show how often these experiences happen to you when you are not under the influence of alcohol or drugs. To answer the questions, please determine to what degree each experience described in the question applies to you, and circle the number to show what percentage of the time you have the experience.

For example:

40 (50) 0% (Never) 10 20 30 60 70 80 90 100% (Always)

There are 28 questions. These questions have been designed for adults. Under 18s should use the Adolescent DES.

Disclaimer: This self-assessment tool is not a substitute for clinical diagnosis or advice.

1. Some people have the experience of driving or riding in a car or bus or subway and suddenly realizing that they don't remember what has happened during all or part of the trip. Circle the number to show what N/A Hiphijord percentage of the time this happens to you.

0% 10 20 30 40 70 80 90 100% 50 60

2. Some people find that sometimes they are listening to someone talk and they suddenly realize that they did not hear part or all of what was said. Circle the number to show what percentage of the time this happens to you.

90 0% 10 20 30 100% 40

3. Some people have the experience of finding themselves in a place and having no idea how they got there. Circle the number to show what percentage of the time this happens to you.

10 20 30 40 50 70 90 100%

4. Some people have the experience of finding themselves dressed in clothes that they don't remember putting on. Circle the number to show what percentage of the time this happens to you.

20 40 50 70 80 90 10 30 60 100%

5. Some people have the experience of finding new things among their belongings that they do not remember buying. Circle the number to show what percentage of the time this happens to you.

0% 10 20 30 40 50 60 70 80 90 100%

6. Some people sometimes find that they are approached by people that they do not know, who call them by another name or insist that they have met them before. Circle the number to show what percentage of the time this happens to you.

10 0% 30 40 50 70 80 90 100%

7. Some people sometimes have the experience of feeling as though they are standing next to themselves or watching themselves do something and they actually see themselves as if they were looking at another person. Circle the number to show what percentage of the time this happens to you.

## Scoring the Dissociative Experiences Scale II

The average of all the answers is the DES score, giving a maximum of 100. The questions are scored by dropping the zero on the percentage of each answer, e.g., 30% = 3; 80% = 8, these numbers are then added up to give a total. The total is multiplied by 10 then divided by 28 (the number of questions) to calculate the average score.

#### **Dissociative Experiences Scale Scores**

High and Low DES Scores High levels of dissociation are indicated by scores of 30 or more, scores under 30 indicate low levels.[1]:22 Successful treatment of a dissociative disorder should reduce the DES score when compared to the result before treatment began.[1]:23 Very high scores do not necessarily mean a more severe dissociative disorder is present, this is because the scale measures both normal and pathological dissociation.[1]:18

### Dissociative Identity Disorder and the DES

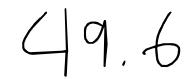

Only 1% of people with Dissociative Identity Disorder have been found to have a DES score below 30. A very high number of people who score above 30 have been shown to have Posttraumatic Stress Disorder or a dissociative disorder other than Dissociative Identity Disorder.[1]

### **Clinical Uses of the Dissociative Experiences Scale**

If a person scores in the high range (above 30) then the DES questions can be used as the basis for a clinical interview, with the clinician asking the client to describe examples of the experiences they have had for any questions about experiences which occur 20% of the time or more. Alternatively, the *Dissociative Disorders Interview Schedule* or *Structured Clinical Interview for Dissociative Disorders-Revised* can be used to reach a diagnosis.[1]

#### Average DES Scores in research

General Adult Population	5.4
Anxiety Disorders	7.0
Affective Disorders	9.35
Eating Disorders	15.8
Late Adolescence	16.6
	1010
Schizophrenia	15.4
Borderline Personality Disorder	19.2
Posttraumatic Stress Disorder	31
Dissociative Disorder Not Otherwise Specified (OSDD & Partial DID)	36
Dissociative Identity Disorder (MPD)	48
